PROJECTS

GravityOrg – club Portfolio Website | July 2025 - August 2025

- Developed a responsive and visually engaging club portfolio website to showcase events, achievements, and organizational culture.
 - Designed a clean, modern UI with structured navigation to ensure an intuitive user experience across devices.
 - Implemented dynamic sections to highlight club activities, member engagement, and onboarding information for new students.
- Tech Stack:** HTML5, CSS3, JavaScript

Digital Student Care Network | July 2025 - August 2025

- Developed a student support chatbot using Flask and Google Gemini AI to provide empathetic, real-time responses to academic and emotional queries.
 - Integrated secure API endpoints for chat interactions with proper JSON validation and error handling, enabling seamless communication between frontend and AI backend.
 - Implemented safety-focused settings to handle sensitive topics responsibly, including automatic guidance for crisis situations and referral to counsellors.
 - Served static frontend files with CORS support, ensuring cross-origin accessibility for web clients.
- Tech Stack:** Python, Flask, Google Gemini AI, JavaScript, HTML5, CORS
